Key	Required	Type	Header Description	Example
Content-Type	true	string	The request content type.	Content-Type: application/json
Authorization	false	string	The vendor authorization token provided by the vendor.	Authorization: Bearer fujs122132132vdafdjsafds

Body:

Field Name	Required	Type	Field Description	Example
job_id	false	string	A job ID from Coupang side	"34c4e7623450"
deals	true	list[Deal]	Multiple product deal informations.	[{"deal_id": "1988776.7648272833", "step_id": "123546", "priority": 2}, {"deal_id": "1877554.6761418533", "step_id": "123893", "priority": 1}]

Deal:

Field Name	Required	Type	Field Description	Example
deal_id	true	string	The product deal ID.	"1988776.7648272833", "1877554.6761418533"
step_id	true	string	The step ID generated by sakong system.	"123425"
priority	true	int	The priority generated by sakong system.	2

HTTP Response

Field Name	Required	Type	Field Description	Example
success	true	bool	The job is created successfully.	true
code	true	string	The error code.	"error"
message	true	string	The error message.	"server error"
data	false	Result		

Result:

Field Name	Required	Type	Field Description	Example
vendor_job_id	true	string	A job ID from vendor side	"1234abcd"

API 2: Retrieve the product results by job ID.

HTTP Request

URL: {BASE_URL}/job/result/{vendor_job_id}

Method: GET

Headers:

Key	Required	Type	Header Description	Example
Authorization	false	string	The vendor authorization token provided by the vendor.	Authorization: Bearer fujs122132132vdafdjfsafds

Parameters:

Field Name	Required	Type	Field Description	Example
vendor_job_id	true	string	A job ID from vendor side	"34c4e7623450"

HTTP Response

Field Name	Required	Type	Field Description	Example
success	true	bool	The HTTP request is success.	true
code	true	string	The error code.	"error"
message	true	string	The error message.	"server error"
data	false	Result		

Result

Field Name	Required	Type	Field Description	Example
vendor_job_id	true	string	A job ID from vendor side	"1234abcd"
status	true	string	The job status: success, failure, processing, ...	"success"
deals	true	list[DealResult]	Product deal results	["1988776.7648272833", "1877554.6761418533"]

DealResult:

Field Name	Required	Type	Field Description	Example
deal_id	true	string	The product deal ID.	"1988776.7648272833", "1877554.6761418533"
step_id	true	string	The step ID generated by Coupang system.	"123425"
priority	true	int	The priority generated by Coupang system.	2
status	true	int	The product result status. 1-processing, 2-success, 3-failure	2
data	true	object	The raw product json object.	{ "buff_meta": null, "data": { "item": { ... }, ... }, "error": null, "error_msg": null }
